

POLICY STATEMENT FOR ENVIRONMENTAL

Environmental protection is a management responsibility to which FRASER has a strong commitment to complying with legal requirements and with other requirements to which FRASER subscribes which relate to its environmental aspects, prevention of pollution and resources saving. Our environmental management system is focused on continual improvement in Source Reduction, Recycling / Reuse, Control and Disposal to making the earth polluted as little as possible. The following principals are basic to achieving the objective:

- a) Continuing provide sufficient resources and facilities for the implementation of waste management, noise and other environmental nuisance abatement;
- b) Obtain and renew the necessary environmental licenses, registrations and permits, and comply with the relevant statutory requirements and licensing standard;
- c) Adopt best practicable technologies and processes for implementation of environmental nuisance abatement during the course of our works;
- d) Communicate to all levels of person involved in the Works;
- e) Participating various type of trainings to enhance the knowledge in environmental protection;
- f) Ensuring the policy is documented, implemented and maintained;
- g) Make sure the policy available to the public;
- h) Encourage our staffs, suppliers and sub-contractors to accomplish the environmental duties;
- i) To share with our staffs, suppliers and sub-contractors about the experience on the environmental issues; and
- j) Environmental policy shall be reviewed annually and whenever necessary to ensure that it will be kept up to date.
